#### BRIEF HISTORY:

Not a lot is known about RogaN. The only thing that is known is that he is one of the Gaia Children. The other thing known is that RogaN's unnatural physical perfection and power are drawn from the Master Summon material that he has around his neck, which uniquely for the Gaia Children isn't embedded in his body, it allows him constant access to the lifestream and thusly the thoughts, memories and feelings of everyone that has ever lived. This allows him to learn techniques that were lost billions of years ago and also he can call on ultimate strength from the lifestream at any given point. This leads him however to fall prey to two mishaps, the first being possession by the Dark Hadou, a dark and devilish style lost in the past and the second, and worst, being that he is able to somehow transform his human body to the level of Super Saiyan and Legendary Super Saiyan via the memories of Broly. When in Legendary Super Saiyan, or Detonator RogaN, form he loses control over his sanity and becomes a great threat to his team.
